

**AMENDMENTS TO THE SPECIFICATION**

**In the Specification:**

Please amend the Specification filed on February 15, 2006, as follows:

- \* Please delete Paragraphs 0045 to 0063.
- \* Please insert the following new paragraphs between Paragraphs 0040 and 0041 (Page 7):

wherein the Step 2) comprises:

2A) the GSN receiving the Create PDP Context Request message;

2B) the GSN performing internal processing and getting the processing result;

2C) if the processing result is that the GSN has created a PDP context successfully, the Cause value is set as "Request Accepted";

2D) if the processing result is that the GSN fails to create a PDP context because no free dynamic PDP address is available, reading the Create PDP Context Request message and checking the version number of the message according to a message header thereof, if it is the GTPv1 version, the Cause value is set as "All dynamic PDP addresses are occupied"; otherwise, it is the GTPv0 version, and the Cause value is set as "No resources available";

2E) if the processing result is that the GSN fails to create a PDP context because there is no enough memory available, reading the Create PDP Context Request message and checking the version number of the message according to the message header thereof, if it is the GTPv1 version, the Cause value is set as "No memory is available"; otherwise, it is the GTPv0 version, and the Cause value is set as "No resources available";

2F) if the processing result is that the GSN fails to create a PDP context due to lack of resources other than the above, setting the Cause value as no resource are available without checking the version number of the created PDP context request message.
